

Spring rain coming... but when? Be ready to catch it

The weather man is telling us that rain throughout spring could be very inconsistent, with scattered storms and prolonged dry periods.

Such conditions make it imperative to renew your farm's water storage capacity. Tanks are a great option to increase capacity at a reasonable price.

Wauchope Mitre 10 and CRT has a range of tanks, in a wide range of sizes and colours ready to order and have delivered straight to your property.

To discuss your specific needs, come in and chat to Steve or Craig, or call us on 6585 1655.
